Databarracks' case study

SERVICED OFFICE SPACE PROVIDER TURNS TO SOFTWAREX AND DATABARRACKS

About Lenta Business Centres

Lenta Business Centres, a member of the CP Holdings Group of companies, is one of the leading providers of serviced office space in London. Lenta Business Centres are also located in Norwich, Watford and Swindon.

Lenta Business Centres has over 25 years' experience of providing a complete serviced office solution for businesses. Prestigious serviced office space is available on a shortterm and flexible basis.

The Challenge

Having modernised the Group's IT environment, Lenta wanted to ensure that a robust solution was in place to ensure data integrity across all unique platforms.

The incumbent backup solution was based around tape technology and manual intervention. The tapes are often unreliable and expensive and the reliance upon an individual is an unfair risk.

The Solution

Softwerx proposed the proven and comprehensive BaaS (Backup as a Service) from Databarracks.

Opting for a dynamic backup strategy provided Lenta with the flexibility to retain a number of restore points, which can be recovered back to site, or on alternative hardware.

The Benefits

Lenta now have a robust and comprehensive backup solution that reliably protects the organisations data. With the deduplication technology included in the service actual data storage requirements were a third of the data being protected, significantly reducing cost.

“Like most businesses, we need to be certain that our data is being backed up securely and safely. Softwerx recommended Databarracks as the best solution available.”

About Databarracks

Databarracks is the UK's specialist business continuity and IT disaster recovery provider.

In 2003, we launched one of the world's first true managed backup services to bring indestructible resilience to mission critical data.

Today, we deliver award winning data and continuity services from some of the most secure data centres in the world, 30 metres below ground in ex-military nuclear bunkers, supported 24/7/365 by our team of handpicked experts.

We make enterprise-class continuity, security and resilience accessible for organisations of all sizes.
